

MODULAR FINE CLEANER

FP1.05.1805.GB

FP-1000 / -1250 / -1500 / -1750 / -2000 / -2500

The FP high capacity modular fine cleaner is a very versatile cleaner applicable for many high capacity cleaning purposes

The machine excels at precision cleaning of a large variety of seed and grain as well as pre-cleaning and sizing when very high efficiency standards are required.

For capacity and all other specific information see the back page.

The modular cleaner offers the below features:

- Feeding section in construction with feed roll, with feed roll and one or two straw drums, with feeding screws and cleaning band, or with vibrator feeder.
- Pre-aspiration in a channel with fixed or variable depth, in a chamber with standard air system or with air recirculation.

- Aspiration in a chamber with one, two or three screws. Rotary valve can also be supplied instead of screws.
- Final aspiration in a channel with fixed or variable depth. A double channel with individually variable depth is also available.
- Screen section consisting of two sieveboats with fixed or variable screen inclination.
- Drive and motors.

The machine is of steel construction with sieveboats of laminated wood.

Options:

- *Sieve section enclosed with doors*
- *Various possibilities for screen inclination*
- *Interlock screen system*
- *Quick change screens*
- *Illumination in final aspiration*

EQUIPPED FOR CHANGE

We provide valuable insights, so you can make qualified decisions

Capacity: estimate [guideline] based on pre-cleaned wheat with max. moisture content of 14%.

DISTINGUISHING ADVANTAGES:

- Choice of modular components to make up a cleaner to suit your specific requirements
- Future upgrading by only changing one or more modules
- Feeding section ensuring an even spread of product over the full working width of the machine
- Highly efficient air system ensuring a uniform aspiration and a good separation of the product
- Easily accessible screens with superior cleaning system
- Sieveboats suspended with fibreglass springs giving a smooth and safe operation due to the centrally located eccentric shaft
- Easy clean-down when changing from one product to another
- In right or left hand construction to suit individual plant layouts
- Low maintenance costs
