

## COLOR SORTING MACHINES FOR PLASTIC INDUSTRY

Sorting plastics reaching high degree of purity means maintaining their value and allowing them to be reused.

Sorting of plastic material is a market in which Elica ASM products can give a strong added value, eliminating defects of different colors, burnt or burnished granules, dimensional non-conformities, flakes and granules of different color and transparency. Furthermore, Elica ASM optical sorting machines are able to identify the different types of plastic, for example:

**ABS, PC, PE, PET, PP, PPS, PPU, PVC, Resina, Nylon, Acrilico**

# COLOR SORTING MACHINES FOR PLASTIC INDUSTRY

 ELICA ASM SOLUTIONS  
ITALIAN SORTING EXCELLENCE

## VISION

Professional optical sorting machine ideal for plastic sorting with the following defects or contamination:

- plastics mix: different colors and transparencies
- foreign material

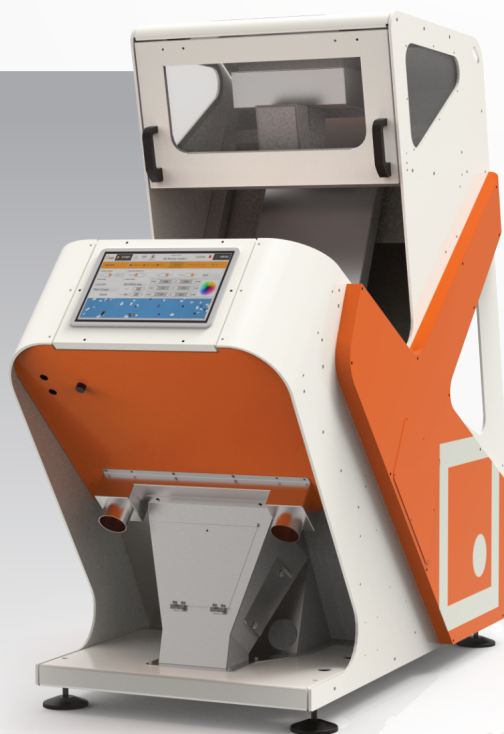

an effective solution with the right price-quality ratio.

## QUASAR

High performance professional optical sorting machine that recognizes even the smallest defects, ideal for:

- plastics with colors and transparencies difference
- foreign material
- black spots
- burned granules
- dimensional non-conformities

High precision of the machine allows not only to recognize the most difficult defects, but also to concentrate as much as possible the waste, thus guaranteeing minimum product loss.
