

# QUASAR Intelligent optical sorter

- High-Resolution cameras
- Advanced SWIR infra-red sensors
- True-Shape technology
- Advanced kernel feature analysis
- Higher throughput
- Sniper Ejector Logic
- New user interface
- IP65 rating
- Fully designed in Italy

## Elica ASM QUASAR

## The Intelligent optical sorter

The ever-stringent quality standards are creating new technical challenges for big and small businesses alike. Helping our customers increase final quality has been the main drive behind the development of Elica ASM's sorting technology and lead to the creation of an entirely new optical sorting machine, designed specifically to meet the new challenges in quality control: the Elica ASM QUASAR.

#### **Total accuracy**

We developed a completely new optical processing architecture called Logic, which is the heart of the machine. This is a combination of very powerful hardware and advanced software algorithms, that closely mimic how the human brain processes visual information.

QUASAR judges many different parameters at the same time, including colors, textures, shapes and size. Because QUASAR judges all of these parameters as a whole, rather than one by one, it is very accurate in deciding what to keep or reject, and incredibly easy to use.

Model	Width	Height	Depth
QUASAR 1000	1910 mm	1821 mm	895 mm
QUASAR 2000	1910 mm	1821 mm	1368 mm
QUASAR 3000	1910 mm	1821 mm	1670 mm
QUASAR 4000	1910 mm	1821 mm	2068 mm
QUASAR 5000	1910 mm	1821 mm	2414 mm
QUASAR 6000	1910 mm	1821 mm	2820 mm

## **Performance features**

- High-Resolution cameras with True-Color image processing technology.
- Advanced SWIR infra-red sensors can sort defects based on physical and organic characteristics.
- True-Shape technology differentiates objects by shape and size, at high speed.
- Higher throughput thanks to a dedicated, upgradable optical processing architecture with high-speed image analysis.
- Sniper Ejector Logic reduces product loss to a bare minimum by dynamically adjusting ejector activity according to contaminant type.
- **Even easier to use**, with a new user interface and intelligent-learning features.
- **IP65 rating**, fully dust-proof and water resistant, built for reliability in the most demanding environments.
- Fully designed in Italy

## Examples

## Simplified user interface

### Tap to sort: create a sorting program in 5 minutes

Thanks to the Intelligent-Learning System, creating a program is as simple as taking a snapshot of a contaminated product sample.

The machine takes a picture of the product as it falls, the user can then tap with a finger the defects to be removed. QUASAR does the rest,

by dynamically creating the correct sorting parameters in order to achieve the best sorting results.

### Higher throughput, increased yield

QUASAR has the widest chutes on the market, paired with lightning-fast processing speed and unprecedented ejector accuracy. It can sort even the smallest products with minimal false-rejects. Available in models from 1 up to 6 chutes, to satisfy any production need.

## Minimal operational costs

Quality construction, energy-efficiency, ease of use and incredible accuracy: these are the qualities that make QUASAR a leader not only in performance, but in cost-effectiveness too.

QUASAR provides a higher yield, higher throughput and increased up-time in a single, reliable sorting solution.

## Elica ASM S.r.I.

Via della Tecnica 3/2 40050 Argelato (B0) Italy Tel. +39 51 05 46 940 Fax +39 51 89 73 86 info@elica-asm.com www.elica-asm.com

#### **ELICA-PROCESSING LTD**

7500 Silistra, Bulgaria 32 Haralampi Dzhamdzhiev St Tel. +359 86 820 820 info@elica-pro.com www.elica-pro.com

## **ELICA** systems solutions

#### **MACHINES**

- Pre-cleaners
- Fine cleaning and calibration separators
- Destoners
- Gravity tables
- Paddy separator
- Seed treaters
- Optical sorting machines
- Hammer mills

## TRANSPORT EQUIPMENT

- Bucket elevators
- Z-elevators
- Chain conveyors
- Closed loop chain conveyors
- Belt conveyors
- Screw conveyors
- Flexible screw conveyors
- Sweep chain conveyors

#### **DEHULLING EQUIPMENT**

- Dehullers for:
- oil chrushing plants
- installations for dehulling a sunflower seeds for kernels
- High performance screen cleaner for separating into fractions
- Hulls beaters

#### **TURN KEY SOLUTIONS**

- Complete sunflower kernels processing installation
- Complete sunflower dehulling installation for oil-crushing plants
- Complete feed mill installation
- Complete seed preparation installation
- Complete silo plant with handling equipment
- Complete pulses processing installation
